The FIM System® Advantage

An Outcomes Product for Short-Term SNF Rehabilitation Programs

Make your data work for you!

A FIM System® Subscription provides:

- A simple, valid way to demonstrate your program’s effectiveness
- Reliable data to market your program
- A precision case management tool for monitoring each patient’s functional progress

A FIM System® subscription enables you to:

- Support your admission decision by documenting functional decline as a result of medical conditions
- Generate data that differentiates your program with referring hospitals, physicians, families, and payers
- Determine the severity of patient disability upon admission, and monitor functional gains and goal attainment
- Generate key data to support your CARF accreditation initiatives

See what other programs around the country are discovering!

Reports
Benchmark reports provide facility outcomes with national comparative data. Corporate reports are also available.

Clinical benefits
- Use total FIM® ratings as a predictor of the burden of care as measured by minutes of care required daily.
- Use FIM® profile reports to characterize patient deficits, target interventions, monitor progress, and facilitate team conferences.
- Set rehabilitation goals and monitor goal attainment.
- Access impairment-level outcomes, such as discharge destination and expected length of stay.
- Improve communication with patients and families.
- Track quality indicators (e.g., pain, pressure ulcers, and safety issues).

Program benefits
- Track data by referring physician or hospital, and provide critical performance feedback.
- Document positive performance indicators in marketing materials.
- Obtain quantitative data for negotiations with payers in managed care organizations.
- Compare performance to external reference points provided solely for SNFs.

Education, training, and consultation
- **Training and credentialing:** UDSmr offers a variety of training programs and resources. We also conduct a two-phase credentialing process that ensures proper collection of data by each facility.
- **Consultation:** UDSmr provides the clinical expertise subscribers need to analyze, interpret, and apply data in support of their unique needs. On-site clinical consultative services are also available.
