2014 Regional Workshops

Come to San Diego, California, for the 2014 San Diego Regional Workshops on February 10–12.

Available Sessions:

IRF ICD-10 Coding: The Path to Success

Improving your clinical and financial performance depends on a thorough understanding of ICD-10-CM coding by multiple disciplines. In this workshop, taught by an AHIMA Academy approved ICD-10 trainer, attendees learn about features and clinical concepts new to ICD-10 and discover the benefits of representing each case with greater specificity. A comprehensive review of coding conventions, guidelines, and required documentation elements are presented and discussed by an experienced rehab coder. Participants apply the concepts by completing case studies and coding exercises.

The target audience for this workshop is coding professionals, HIM managers, PPS coordinators, physicians, nurse practitioners, physician assistants, and other clinical providers.

This continuing nursing education activity was approved by the New Hampshire Nurses’ Association Commission on Continuing Education, an accredited approver by the American Nurses Credentialing Center’s Commission on Accreditation.

It has been approved for 6.0 nursing contact hours.

It also has been approved for 0.6 CEUs by AOTA. UDSmr is an AOTA Approved Provider of continuing education. Assignment of AOTA CEUs does not imply endorsement of specific course content, products, or clinical procedures by AOTA.

Learning objectives can be found at the following URL:
http://www.udsmr.org/Documents/Pro/IRF_ICD-10_Coding.pdf

Attendance at the entire workshop is required for continuing education credits—partial credit will not be awarded. Each participant is required to complete a course evaluation.

Rehab Nursing Documentation: Supporting the Nurse’s Role in the Interdisciplinary Team

This full-day workshop analyzes the difficulties rehabilitation nurses face in providing accurate functional documentation that supports their expertise and importance as members of the interdisciplinary team. The workshop emphasizes how to capture the nursing staff’s burden of care during the admission assessment time frame, which is crucial to identifying the correct CMG for each patient. The presenter examines many factors that can limit nursing’s integration into the interdisciplinary team’s daily documentation, including internal policies and procedures, inefficient documentation tools, and a lack of documentation that illustrates interdisciplinary communication. Learn how to illustrate the value of rehab nurses as members of the interdisciplinary team and how to help them document their expertise from admission to discharge.

This continuing nursing education activity was approved by the New Hampshire Nurses’ Association Commission on Continuing Education, an accredited approver by the American Nurses Credentialing Center’s Commission on Accreditation.

It has been approved for 6.1 nursing contact hours.

It also has been approved for 0.6 CEUs by AOTA. UDSmr is an AOTA Approved Provider of continuing education. Assignment of AOTA CEUs does not imply endorsement of specific course content, products, or clinical procedures by AOTA.

Learning objectives can be found at the following URL:

Attendance at the entire workshop is required for continuing education credits—partial credit will not be awarded. Each participant is required to complete a course evaluation.

Available sessions continued on next page.
Available Sessions:

Bouncebacks: Identifying Acute Readmissions from Inpatient Rehabilitation (half-day workshop!)

The delivery of high-quality, patient-centered health care requires integration from many parts of the continuum, including effective coordination of transitions between providers and care settings. Poor coordination of care across settings may result in readmissions, many of which can be prevented. Working to reduce readmissions is one way of addressing quality improvement in your rehabilitation facility.

This half-day workshop is presented by a physiatrist and a rehabilitation researcher, and it examines the problem of readmissions back to acute care and readmissions after completion of the rehabilitation program within thirty days. The workshop describes the current research and identifies potential risk factors in a variety of conditions that place these patients at high risk for rehospitalization. The workshop also highlights pre-admission considerations and discusses actionable risk-reduction strategies that can have a positive effect on rehabilitation healthcare.

This continuing nursing education activity was approved by New Hampshire Nurses Association Commission on Continuing Education, an accredited approver by the American Nurses Credentialing Center’s Commission on Accreditation.

It has been approved for 3.5 contact hours.

It also has been approved for 0.3 AOTA CEUs. UDSmr is an AOTA Approved Provider of continuing education. Assignment of AOTA CEUs does not imply endorsement of specific course content, products, or clinical procedures by AOTA.

Learning objectives can be found at the following URL:
