# The UDS-PRO<sup>®</sup> Advantage

## Software

- Cloud solution that provides secure and efficient IRF-PAI data collection and CMS submission processes
- Compatible with latest versions of Internet Explorer, Safari, Mobile Safari, Google Chrome, and Firefox
- Simplified security and sign-in procedures available with optional LDAP and SAML login
- A physician portal that allows read-only and sign-off access from laptops, tablets, and phones
- Easy XML import/export options, including a compatible file format for CMS submissions and a CMG export file that sends relevant CMG data to your billing department for reconciling the UB-04 with the IRF-PAI
- Optional automated nightly and weekly data extractions into your hospital's data warehouse
- Optional HL7<sup>®</sup> interfacing with any EMR for ADT/DFT, IRF-PAI, and document exchange (PDF)
- Historical database conversions

## Features

- Regular updates to comply with IRF-PAI data requirements
- Projected CMG, length of stay, facility-adjusted federal prospective payment, and 60% compliance
- Preadmission module that sends physician e-mail alerts, monitors compliance with signature time frames, and can send the preadmission screen to your EMR as a PDF file via HL7<sup>®</sup> interfacing
- Validation checks on patient assessment data that minimize errors prior to CMS submission by:
  - Flagging overuse of dashes on quality indicator items and potential coding inconsistencies between modifiers and related FIM<sup>®</sup> items
  - Enforcing data-entry logic for the BIMS, section GG's functional items, and pressure ulcers
  - Projecting case-level compliance with the 60% rule
  - Assigning the correct CMG
- Valuable ICD coding lookup tool that helps select the correct etiologic diagnosis, identifies ICD combination codes, and prioritizes your IRF-PAI ICD code list based on optimal tier selection and compliant coding
- Powerful informatics data that provides case-level CMG expectations for care plans and discharge planning, along with our respected annual Program Evaluation Model CMG targets for precise case management goals

## Resources

- Credentialing module dashboard and credentialing reports that provide a fluid process for administering tests, monitoring testing progress, evaluating your staff's rating proficiency, and testing new employees
- Exclusive online library of clinical resources, training materials, and CMS references
- Clinical and coding help desk support from 8:00 a.m. to 5:30 p.m., Monday to Friday
- Online clinical chat room and forum that provide access to UDSMR's subscriber community
- Routine bulletin alerts and webinars about CMS notices and MAC/RAC updates

## Benchmarks

- Largest independent database, representing over 80% of all IRFs, with stable performance targets
- Severity-adjusted reports with state, regional, national, and facility-level comparatives
- Comprehensive library of performance and compliance reports on key IRF metrics
- User-friendly drill-down and export capabilities for pinpoint analysis
