

Virtual PPS Boot Camp

UDSMR is pleased to offer our extremely popular **PPS Boot Camp** as a **virtual experience!** This highly interactive three-part workshop is designed to provide attendees with an in-depth understanding of the IRF PPS regulations that govern IRF-PAI completion. By attending the PPS Boot Camp remotely, attendees will be expected to participate in a comprehensive review and to exhibit an ongoing understanding of IRF-PAI coding (including completing the quality indicator items), CMG assignment, pertinent IRF PPS regulations, and much more by means of an interactive forum. In order to ensure that each attendee benefits from the virtual workshop, at least two of UDSMR's clinical support specialists will present each part jointly. The attention of two specialists throughout each part will provide attendees with classroom-style learning benefits and the experience of an in-person presentation without the hassle of traveling. Whether they are brand-new to an IRF or have years of experience in inpatient rehab, attendees will benefit from this in-depth virtual workshop and its comprehensive resources.

Once registered for this workshop, attendees will receive a welcome letter that includes specific instructions on how to prepare for the upcoming Boot Camp.

Register today to ensure a spot in the virtual PPS Boot Camp!

Part 1

This training will use relevant resources from UDSMR and CMS to provide the following:

- An orientation to *The IRF-PAI Manual*
- Identification of the different chapters and appendices of the current version of *The IRF-PAI Manual*
- A review of how to complete each section of version 4.0 of the IRF-PAI, effective October 1, 2022
- A discussion of definitions and coding considerations for the quality indicator sections of the IRF-PAI

Part 2

This training will use relevant resources from UDSMR and CMS to provide the following:

- An overview of how to enter case data into the UDS-PROi[®] software
- Descriptions of CMS's postdischarge requirements
- Explanations for coding impairment group codes, etiologic diagnoses, and comorbid conditions on the IRF-PAI

Part 3

This training will use relevant resources from UDSMR and CMS to provide the following:

- A review of CMG assignments
- A comparison of payments for typical and atypical cases

- A breakdown of the 60% rule
- A description of various reports available to UDSMR's subscribers
- An explanation of UDSMR's QI credentialing system
