

# Tailored inpatient rehabilitation consulting services for optimized processes and improved patient outcomes

At UDS<sub>MR</sub><sup>®</sup>, now part of McBee, we specialize in providing on-site and virtual consultations that strengthen key roles at your inpatient rehabilitation facility (IRF), including the program director, PPS coordinator and admission liaison.

Our experienced consultants can also work closely with your inpatient rehabilitation team to conduct a customized needs assessment or a chart audit. Regardless of which option you choose, you will receive customized hands-on consulting services that will help ensure that your facility is following CMS guidelines and that your processes are effective and efficient.

Our team of IRF industry experts will conduct a thorough assessment of your facility's specific processes, challenges and opportunities and develop a work plan designed to support your facility's process improvement goals.

- Our consultations and assessments include:
- An analysis of day-to-day operations and roles
- Shadowing and attending interdisciplinary meetings
- Education on applicable policies, procedures and IRF regulations, including relevant coding
- Data analysis of UDS-PRO<sup>®</sup> reports (for UDS<sub>MR</sub>/Netsmart subscribers only)
- Monitoring regulatory compliance

McBee Inpatient Rehabilitation Consulting Services aim to optimize your rehabilitation programs and maximize patient outcomes.
