

## Chart Audits

UDS<sub>MR</sub>, now part of McBee, offers many valuable types of chart audits. Whether you need feedback on IRF-PAI and/or UB-04 coding, physician and clinical documentation, preadmission screens, or CMGs, we've got you covered!

### Coding/clinical audits (coding-only and clinical-only options available)

- A review of the ICD-10 codes your facility recorded on the IRF-PAI for etiologic diagnoses, comorbid conditions, and complications, plus an analysis of the impact of these codes on tiers and compliance
- A clinical review of the accuracy of your facility's impairment group codes (IGCs) and case-mix groups (CMGs)
- An optional review of the principal and secondary diagnoses your facility recorded on the UB-04
- A clinical review of required IRF documentation technical criteria, medical necessity criteria, therapy intensity criteria, and admission IRF-PAI coding for section GG (self-care and mobility) and section H (bladder and bowel continence), plus the effects of these factors on your facility's reimbursement

### Preadmission screen audits

- A review of your facility's preadmission screens
- A review of acute care documentation associated with each case in order to determine the accuracy of the information in your preadmission screens

### Four-digit CMG audits

- A review of your facility's IGC selections and admission IRF-PAI coding for sections GG and H, plus an analysis of their effect on reimbursement
- An optional add-on review of your facility's discharge IRF-PAI coding section GG, plus an analysis of its effect on outcomes

Each audit type includes various deliverables designed to meet your facility's specific needs: a report that identifies observations and trends, individual scorecards for each case, and follow-up calls to discuss the review's findings with your team.

If your facility will be affected by the IRF Review Choice Demonstration (RCD), our audits and follow-up education will help you prepare for its implementation in your state. Our evaluation of your IRF records and our valuable follow-up recommendations will improve your likelihood of positive affirmation rates for either the pre-payment or post-payment review process.
